SUMMARY

Computer Science and Engineering student specializing in Cyber Security, with interests in cybersecurity, SOC analysis, AI, machine learning, and software development. Strong problem-solving skills with an interest in AI-assisted coding and rapid prototyping.

EDUCATION

Chennai Institute of Technology, Chennai *2025 – 2029*
B.E. Computer Science and Engineering – Cyber Security **CGPA: 8.5/10**

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, JavaScript
Cybersecurity: Cybersecurity Fundamentals, Network Security, SOC Fundamentals, Log Analysis, Incident Analysis, Android Malware Static Analysis
AI/ML: Machine Learning, Deep Learning, CNN, NumPy, Pandas
Web Development: HTML, CSS, JavaScript, React, Node.js, Express.js, Vite
Databases: SQL, SQLite, MySQL, MongoDB, SQLAlchemy
Tools and Platforms: Git, GitHub, Linux, Ubuntu, VS Code, FastAPI
Other Skills: AI-assisted Coding, Rapid Prototyping

PROJECTS

Explainable and Prerequisite-Aware Knowledge Gap Detection Using Machine Learning
- Explored machine learning techniques to identify student knowledge gaps and provide interpretable insights into prerequisite learning concepts.
- Focused on explainable predictions to help identify prerequisite concepts that may need additional learning support.

Retrieval-Augmented Generation (RAG) System
- Developed a RAG-based system that retrieves relevant information from a knowledge source and uses it to generate context-aware responses.
- Combined information retrieval with a language model to improve response relevance and reduce unsupported answers.

AetherGrade – Student Performance & Security Engine
- Built a Java and MySQL platform for student grades, percentages, attendance eligibility, and academic analytics.
- Implemented role-based access control, JWT authentication, PBKDF2 password protection, AES-256-GCM encryption, and a tamper-evident SHA-256 audit ledger.

FraudLens AI – AI-Powered Fraud Intelligence Platform
- Developed a platform to analyze digital payment identities and generate fraud risk scores.
- Designed fraud reporting, graph exploration, and geographic fraud visualization features.
- *Technologies:* FastAPI, React, TypeScript, SQLAlchemy, SQLite, Vite.

TECHNICAL TRAINING

Security Operations Center (SOC) Training
- Gained exposure to security event monitoring, log analysis, incident analysis, and SOC workflows.

CERTIFICATIONS

- AWS Cloud Practitioner Essentials
- Cisco Networking Academy – Networking Basics
- Python Essentials 1
- Google – Gemini Certified University Student

WORKSHOPS

- Be10x AI Tools Workshop
- Real-Time Security Operations Center (SOC) Training

ACHIEVEMENTS

- Solved **450+ LeetCode problems**, demonstrating consistent problem-solving practice.
- Secured **97%** in Class 12 and achieved third rank at school.
- Secured **98%** in Class 10 and achieved first rank at school.
